Project Experience

Following are a few of the projects under which I've worked

Neurology - HealthCare

Description:

Neurology is a flexible and adaptable patient engagement portal, configurable by both the provider (NHS) and end user (patient, clinician, carer), creating a fully personalized experience, catering to individual needs and customized to the specific clinical priorities of each service within any healthcare provider.

Neurology is developed and co-designed with users to provide citizens with choice, control and support to live independent lives. This enables people to access outstanding tailored care and support via the Neurology portal

Thalamos - HealthCare

Thalamos' software joins up admission, treatment and discharge care pathways. We support healthcare professionals to provide a swifter, simpler and safer experience for those in need of acute mental healthcare. We remove the complications and hurdles involved in assessment, admission, treatment and discharge.

Thalamos is developed through personal lived experience, focus group research, clinical safety experts and consultation with our advisor and steering groups. Before any product feature is

developed, it must undergo strict testing to ensure patients will not be adversely affected.

B ROOK:

Brook is a sexual health and wellbeing services across the UK and it provides STI home test kits, Pregnancy calculator and Contraceptives. Using Admin portal, we can approve or reject STI's and manage the order requests, roles and permissions for user, Admin and Super admin

PesoFinance

Peso finance software which is used to manage information about financial transactions between individual person or company. By using this application they are able to share investment related information, here to make investments easier than ever for them. Products is focussed on creating a one-stop solution for all financial needs. Software includes online services that allow users to retrieve transactions from various providers – such as their bank or credit card company.
