Security Testing Tools	: Checkmarx, sonarqube
Test Management Tools	: QC 10.00, 11.00 (Quality Centre)
RDBMS	: SQL Server and Oracle
Scripting Languages	: VB Script.
Operating Systems	: Windows 7/8, 11, Windows Server 2008/2008R2/2012, Mac OS
Domain Knowledge	: Payroll management, Logistics, Speech recognition, Banking and Automobiles.

WORK EXPERIENCE:

EBIXCASH Financial Technologies – Senior Test Lead (Nov 2023 to Present)

Product 1: LOS - Loan Originating System

LOS is an application that comes into effect when a borrower approaches a Bank / Financial system with a need, there are a sequence of steps involved to capture the details. This involves checking their eligibility, verification of identity and approval or rejection of funds requested as per the eligibility. This is captured in this system and customized as per the needs of the customers.

Product 2: LMS - Loan Management System

LMS comes into effect after the loan has been approved and disbursed, the activity involves in sending and receiving of pending amount details, different set of loans have different interest rates, EMI's, due dates etc. These records need to be maintained and calculated accordingly without any differences to the customer or the financial institution. This product ensures all data are captured and maintained accordingly.

Product 3: Collections

Collections is the final phase in the whole system. Following-up and collecting the amount receivable is a challenge, this collection involves multiple steps i.e, collection through agents, collections through bank transfer etc. But to follow up or remind a customer who is not doing the repayment on due date is a tedious task, the customer is reminded via email, sms, phone calls etc. Multiple reminders and follow-up's and the payment done by the customer has to be captured and updated accordingly which is done through this product.

Roles & Responsibilities:

- 1) Handling 10+ member team on various projects.
- 2) Involving in Handling the team activities such as Preparation of Test plan, estimation of effort for the requirement, Test case review, Execution activities, Report generation, Client Interaction etc.
- 3) Directing the team in testing related activities for the 3 different products
- 4) Involved in preparing Monthly report on the projects and submitting to the management
- 5) Involved in maintaining Audit activities to ensure all the project related documents are captured and updated in the repository
- 6) Preparation of Risk register in accordance to the project
- 7) Preparation of Defect analysis on the issues faced by client in the application and fix them with the help of developers.
- 8) Preparation of Release notes to the client for the release of any CR's

RR Donnelley- Senior Test Consultant (Sept 2018 to Nov 2023)
