EDUCATION

RAJALAKSHMI ENGINEERING COLLEGE

BACHELOR'S OF ENGINEERING(CSE)
2009 - 2013

VELTECH POLYTECHNIC COLLEGE

DIPLOMA IN COMPUTER TECHNOLOGY
2007 - 2009

WORK EXPERIENCE

HDATA INFO SYSTEMS

SOFTWARE ENGINEER
DEC 2018- Till Date

ZIFO DATA

SYSTEM ADMINISTRATOR
JUNE 2015 - OCT 2018

TECHNICAL SKILLS

- Oracle SQL
- Informatica
- Snowflake
- UNIX
- SSIS
- JIRA

CARRER OBJECTIVE

To achieve a challenging position in Software Testing and Quality Management in a company, where acquired skills will be utilized towards continued growth and advancement

PROFESSIONAL SUMMARY

- Overall 5+ years of experience in ETL testing with skills of Oracle SQL, UNIX, SSIS and ETL concepts.
- Involved in leading and participating in the full software life cycle for testing(STLC) activities - test planning, test execution, test monitoring, status reporting, documentation and report validation.
- Sound knowledge and experience in star schema/ snowflake schema, analyzed source systems, staging area, fact and dimension tables in target DW.
- Responsible for creating complete test cases, test plans, test data and reporting status ensuring accurate coverage of requirements and business processes.
- Involved in Functional Testing & Regression testing.
- Extracted data from various source like Oracle, flat files, SQL server.
- Performed integration, end to end and system testing.
- Performed data validation testing through SQL queries.
- Experience in UNIX commands, SQL Joins, Group functions,
- Analytical functions and Sub queries.
- Clear understanding of business procedures and ability to work as an individual and as part of team.
- Experience on using waterfall and Agile methodologies.
- Have working knowledge with all stages of Software Development Life Cycle (SDLC) and Software Testing Life Cycle(STLC).
- Knowledge and experience with Business Intelligence (BI) data warehousing environment.
- Giving demo/walkthrough to the product owner after every sprint.
- Participating in peer review of the team member's test cases.
- Impact analysis on the existing automation scripts due to the new changes in the sprint.
- Participated in sprint planning and giving estimates for the testing tasks assigned.

ROLES & RESPONSIBILITIES

PROJECT 1

CLIENT

DexCom ,United States

DOMAIN

HealthCare

- Performed ETL test scenarios by writing SQL scripts with consideration of Business scenarios
- Exclusively worked with ETL team to analyze the source and target database system
- Transforming business requirements and technical specifications into test cases, test scripts.
- Validating source and target tables as per business requirements.
- Involved in data quality validation including row count check, sample data validation and data reconciliation.
- Participated in Weekly Project status and bug status meetings and updated the Progress.
- Involved in meetings with business analyst and developers during requirements gathering.
- Prepared test cases, test data, requirements gathering, change in requirements etc.
- Attending calls for updating the status on a daily basis

PROJECT 2

CLIENT

Bancorp, United States

DOMAIN

Investment Banking

- Analyzing the business requirements and technical specification documents.
- Analyzed the project and tested the source data, staging data and target data.
- Analyzed application data using the SQL to identify the ETL process modifying.
- Validated the test mapping and test data based on the functional requirements.
- Performed Functional and Regression testing for each release and also supported End-to- End data validation.
- Execute and validate the data loaded on various data levels to ensure the transformation logic is met using Complex SQL.
- Involved in bug fixes verification and validations.
- Participated in Weekly Project status, bug status meetings and updated the progress.
- Interacting with the development team regarding any issues/defects with the code or deployment
