Career Objective

Achievement-driven Professional targeting assignments in software Quality Assurance Projects with an organization of repute.

Career Summary

- **4.6 years** of experience in **Software Testing** in Automation Testing.
- Experience in Test Automation using **Selenium Web driver**.
- Experience in **POM Design Pattern, Junit, TestNG, Data Driven and BDD(Cucumber) Framework**.
- Good understanding of Software Development Life Cycle (**SDLC**) and Software Testing Life Cycle(**STLC**).
- Excellent knowledge and working experience in Automation Test Planning, Automation Test Execution and Test Results analysis, **Defect life cycle** management, Debugging, Test Results Documentation and Release activities.
- Defect Reporting and Tracking using Automation Tools like **JIRA**.
- Experience in preparation of automated test scripts to perform **Regression** testing using Selenium.
- Experience in **API testing using Rest Assured API** and Postman for automated service testing.
- Capability of working under pressure, to meet strict project deadlines and achieve complete customer satisfaction.
- Self-motivated, Positive orientation towards expanding present knowledge base, good team spirit and willing to accept challenging assignments.
- Performed Functional testing for accounting stream liaising with developer team
- Assured Framework, GET/ POST/ PUT/ PATCH/ DELETE as part of automation of services testing.
- Experience in Build Automation tools like Maven and Continuous Integration Tools like Jenkins

Professional Experience

- Worked as Senior Test Engineer in **Matrimony.com** since Dec 2021 to Till Date
- Worked as a Software Test Engineer in **Information Dynamics India Private Limited** since Oct 2019 to Dec 2021.

Key Skills

Operating Systems : Windows 7, Windows 10
Technologies : Java, Selenium, Rest Assured API,
Project Frameworks : POM, Cucumber, JUnit, Data Driven
Process : Agile methodology
Build Tools : Eclipse, Maven, Postman
Bug Tracking Tool : JIRA, Bugzilla
Version Control Tool : Git

Project Details

Project Name: Matrimony

Project Description:

Matrimony.com is a leading matchmaking and marriage service provider. The Project aims to enhance the online platform, integrating advanced technologies and improving user experience. Redesign the user interface for better navigation and engagement. It includes to Revamp the API and UI changes in the Apps to provide a seamless experience across all platforms.

Roles & Responsibilities:

- Understanding the requirements and functional specification of the application.
- Identify the test Scenario to be automated
- Experienced in preparation of automation scripts for Selenium for user stories in JIRA
- Experience in setting up test environment for automated scripts execution using Java and Cucumber.
- Preparation of automation scripts for Selenium WebDriver and Cucumber Framework.
- Preparing the Feature file, Step Definition, POM, Utility class in Cucumber Framework.
- Executing the test cases and debugging

- Execution of Smoke, Sanity and Regression suites during new releases and analyses the test failures.
- Raising bugs through defect tracking tool, JIRA.
- Code push and pull in GIT.
- Actively participated in all the Agile Scrum Ceremonies. Attending sprint planning, daily scrum calls, sprint reviews, sprint retrospective

Project Name: Walk Score

Project Description:

Walk Score a subsidiary of Redfin provides walkability analysis and apartment search tools. Its flagship product is a large-scale, public access walkability index that assigns a numerical walkability score to any address in the USA, UK, Canada and Australia.

Responsibilities:

- Having good Knowledge of Selenium with Java Self-review and Peer-review the test cases.
- Worked on creating Test Plans, Test Cases, Test Scripts, and the entire Testing process.
