

BABYRUCKMANI S

AUTOMATION TESTER

Chennai | 9600415936 | babyruckmanis1111@gmail.com

SUMMARY

Experienced Automation Test Engineer with 3 years of experience in software testing using Playwright and Selenium. Expertise in functional, regression, and integration testing across web applications. Proven ability to analyze test requirements, design automated scripts, and ensure seamless software performance. Passionate about delivering high-quality software solutions through robust testing methodologies.

PROFESSIONAL SUMMARY

- Overall **3.1 years of experience** in Software Testing with a solid understanding of test planning, Test Design, Test Execution and Defect Tracking & Reporting.
- Experience in **OOPS** Concept and **Java Programming** Understanding and Analyzing Test Requirements, Tracking Changes and Maintenance of Test Requirements.
- Strong hands-on experience in implementing and creating automated tests using Microsoft Playwright, with a solid grasp of **XPath** for locating UI elements efficiently..
- Good Experience in test planning and designing test cases **BDD Cucumber, TestNG, Junit** and **POM Design pattern, Build Automation tool - Maven**.
- Hands-on Experience in Storing the code in **GitHub**, creating the pipeline in **Jenkins**, and much Familiar with **Bug-Tracking tools like JIRA**.
- Experience in customizing organizational standard **test process** and **test template** according to the project requirements.
- Conducted **code reviews** and provided the **feedback** to team members to ensure adherence to coding standards and best practices.
- Documented **test plans, test cases, and test results** to facilitate knowledge sharing and collaboration within the team.
- Provide technical support to troubleshoot and resolve issues related to automated test execution.
- Experience in Manual Testing API using **Postman & Rest Assured for automation**.
- Review of all bugs reported by the quality team and active participation in defect prevention meetings.

TECHNICAL SKILLS

- **Programming Language:** JavaScript ,Java
- **Version Control:** Git, GitHub
- **Automation Testing Tool:** Playwright ,Selenium
- **Test Frameworks:** Mocha, TestNG, Cucumber
- **API Testing:** Postman, RestAssured
- **CI/CD Tool:** Jenkins
- **Reporting Tools:** Allure Reports, Extent Reports
- **Defect Management:** JIRA
- **Database Skills:** MySQL
- **IDE :** VS Code, Eclipse
- **Locator Strategies:** XPath, CSS Selectors

EMPLOYMENT HISTORY

- **Company Name:** Universal Softech Hub Pvt Ltd
- **Designation:** Automation Test Engineer
- **Duration:** 3.1 years (April 2022 - March 2025)

WORK EXPERIENCE

Project title: TrendBazaar

Duration: April 2022 - May 2023

Domain: E-commerce / Retail

Description: TrendBazaar is an international fashion e-commerce platform that facilitates seamless cross-border transactions and deliveries. The project involved testing the platform's performance, payment gateway integrations, and regional currency compatibility.

Roles & Responsibilities :

- Analyzed user stories and identified **end-to-end test** scenarios for automation.
- Performed regression and system integration testing using **Selenium WebDriver, TestNG, and Cucumber with BDD** approach.
- Developed modular and reusable automation scripts using **Java, Selenium, and Maven**, implementing frameworks like **POM and Cucumber** (feature files, step definitions, hooks, utilities).
- Automated test cases using locators and Selenium methods; **handled execution, error handling, and debugging**.
- Automated test cases using robust **XPath** expressions and other Selenium locators, applying Selenium methods for efficient interaction with **UI elements**.
- Utilized Jira for defect tracking and **Git for version control (code push/pull)**.
- Actively involved in Agile Scrum ceremonies including daily stand-ups, sprint planning, reviews, and retrospectives.
- Maintained and updated test automation resources for ongoing project needs.

Project title: Vitals360

Duration: June 2023 - Till Present 2025

Domain: Healthcare

Description: TVitals360 is a cutting-edge healthcare application that integrates with wearable health monitoring devices to track real-time health data and provide analytics for medical professionals.

Roles & Responsibilities :

- Automated functional and regression testing using **Playwright with JavaScript** to ensure accurate stock synchronization across platforms.
- Designed, implemented, and maintained automation frameworks using **JavaScript and Mocha**.
- Conducted thorough manual testing to validate UI and backend integration for inventory data.
- Performed **API testing** using **Postman and RestAssured** to verify real-time stock updates and third-party integrations.
- Utilized Allure Reports to track test results and deliver actionable insights to the development team.
- Managed version control with **Git and GitHub**, ensuring efficient collaboration and test script maintenance.
- Utilized **XPath** and other locator strategies in Playwright to reliably interact with complex **UI elements** during automated testing.
- Logged and tracked defects using JIRA, ensuring timely resolution and follow-up.
- **Conducted Knowledge Transfer (KT)** sessions and created onboarding documentation for new team members.
- Enhanced test coverage by identifying gaps and implementing additional test cases for edge scenarios.
