

CHERMAN BABU

Manager - Software Testing

PROFILE SUMMARY

With 13 years of experience in software quality assurance and testing, I have a proven track record of managing complex test projects, leading cross-functional teams, and delivering high-quality software products. Skilled in developing and implementing test strategies, ensuring industry standard compliance, and enhancing testing processes. Proficient in analytical and problem-solving skills, with a strong focus on continuous improvement and customer satisfaction. Adept at leading teams through all phases of testing, including automation, performance, and security testing. Known for effectively collaborating with stakeholders to drive efficiency and accuracy in testing processes.

Manager - Software Testing

ISC Global Solutions

- Lead a team of 20+ QA engineers in delivering end-to-end testing solutions for enterprise-level applications.
- Developed and maintained automated test scripts using Playwright, enhancing the efficiency and reliability of end-to-end testing.
- Develop and implement comprehensive test plans, strategies, and frameworks to ensure the highest quality standards.
- Oversee the execution of functional, regression, performance, and automated tests, ensuring timely delivery of project milestones.
- Developed and executed comprehensive API automation Tests using tools like Postman and RestAssured, ensuring robust and reliable API functionality, and reducing manual testing efforts by 60%.
- Collaborate with development, product management, and business teams to define requirements and ensure testability.
- Introduce continuous integration (CI) practices, resulting in a 25% reduction in defect leakage to production.
- Conducted performance testing using tools like JMeter and LoadRunner to identify bottlenecks and optimize application performance, leading to a 30% improvement in response times and system scalability.
- Mentor junior team members, fostering a culture of continuous learning and improvement.
- Manage relationships with key stakeholders, providing regular status updates and test metrics.

Nov 2011 - Sep 2022

Manager - UI & UX

Paragon Digital Services

- Responsible for managing the end-to-end service line for Software Testing.
- Prepare and review the capacity/resource management plans periodically to ensure the attrition/new project requirements can be handled without any glitches and also it doesn't impact any budget allocation for the teams.
- Work closely with all the stake holders including Product, Design, Engineering and QA team to identify the gaps during release cycles.
- Developed and maintained automated test scripts using Cypress to ensure the quality and performance of web applications, reducing dev Unit testing time by 50% and increasing overall test coverage before the code get deployed to QA.
- Managing multiple projects of different types including UAT/Functional/E2E/Automation/API/Mobile app testing at a same time.
- Designed and implemented automated test frameworks using Selenium and Java, enhancing test efficiency and reliability, and reducing regression testing time.
- Communicate the Release progress to all the parties by sending the periodic reports after the assessments and reviews with internal / external teams during releases.
- Perform the client visits and conduct the business review (Visited USA two times and Holding B1 visa for ten years).

Projects

846 Days

Personal AI

A personal AI is a digital version of your mind that continuously learns from your personal knowledge and experiences, has your unique personality and style, and is able to interact and collaborate with your digital community.

Responsibilities:

- Design and Create test cases/ test plans for the new features Automate all the regression cases via Test Project
- Schedule the Automation jobs to trigger the execution of regression test suites
- Responsible for setting up the API testing for all the new end points that???s being created
- Setting up the Monitors for all the API end points to ensure all the API???s are Up and running
- Create and share the test reports for API???s / Regression test suites to the stack holders

1242 Days

Dentsu Connect

Dentsu connect is an internal media ecosystem platform for Dentsu International and it is built to replace the use of different platforms currently in use for Digital advertisement agencies/vendors.

Responsibilities:

- Prepare the UAT approach and present it to the management board Coordinate with the Dev / Product team to get the UAT scripts and prepare the overall UAT test plan.
- Obtain sign-off for the UAT plan from leadership.
- Coordinate with the different app teams/BA???s/SME???s to schedule the UAT session and assist in the execution of UAT scripts.
- Prepare / Share the reports on test participants on the UAT execution, bugs and resolution processes.
- Provide standard operating procedure (SOP) steward with list of SOPs to be developed/revised according to established timelines. Manages central repository of UAT documents, scripts and material

1548 Days

○ HMX

HMX is an demand side platform used by Agencies in Dentsu clients for to maintain their digital Ad inventory to help setting up their Ad campaigns

Responsibilities:

- Leading the Client status call and discuss current/future sprint Activities status (includes Development activities)
- Lead the Sprint planning with client
- Reviewing the PRD document and provide effective feedback on Product/feature enhancement to client
- Based on the information procured from the PRD document, deciding how the application needs to be tested and follow-up with the client for required access/input to test the application
- Responsible for End to End Regression/New feature testing for the product
- Defining the scope of testing within the context of each release Deploying and managing resources for testing
- Applying the appropriate test measurements and metrics in the product and the Testing Team

4714 Days

○ Glint

Glint is a famous People Engagement Platform and it is widely used by all the enterprise clients includes Microsoft,LinkedIn,Amazon etc

Responsibilities

- We help Glint with their end-to-end web application testing including regression, functionality, and mobile app testing. Responsible for the releases and 99.9% of releases were rolled out to Production on scheduled time.
- Delivered the First class Quality by consistently keeping the quality SLA??s as 97% for the last 8 years
- Identified and automated 30% of regression test cases by keeping the manpowers intact
- Increased the billable resources from 1 FTE to 12 FTE and succeed in getting all the services involves testing (Mobile/ Performance etc)
- Suggest the tools/software that helps to maintain the test cases or for the automation
