Services

Functional testing

Detect defects in advance

Identify and eliminate defects in the early stage of product development.

Isolate potential risks

Remove defects with lesser time to resolution

Smooth Updates

Retain software quality and smoothly introduce new enhancements

Note : remove the (.) dit

AUTOMATION testing

Test Big Data

Scrutinize and test large, complex codes easily and quickly

Increase App efficiency

Use automation test scripts specific to native platforms

Faster Testing

Perform tests faster than manual testing across platforms, browsers, devices, etc.

Note : remove the (.) dot

SECURITY TESTING

QAonCloud End-to-end Security Testing Services

Ethical Hacking

Our QA teams use ethical hacking to simulate hacker's attacks, detect vulnerabilities from the and aim to rectify them. We help you prevent hackers from stealing and misusing your sensitive data through security loopholes..

Faqs > ON BOARDING

We generally suggest a time period of a couple of weeks for the onboarding process. we would need a few hours from your team, depending on the size of your software and the scope of testing to understand the software in detail so that we can test it effectively.

"W" capital in we. **Not Fixed**

Billing

How will i know what i have to pay at the end of every month?

Capitalize "I" **Not Fixed**

You will be billed and the invoice amount will be what has already been agreed upon per the signed contract .There is never overbilling on our part unless agreed upon previously in certain circumstances, like additional testing resources to the team. In such a case, either the previously signed contract will be amended or you can email us as well based on which we can agree to the new resource number and rates.

Circumstances spelling error. Remove space after contract. Put it like - contract. There is never.....

Testing process

We can test your app on a variety of devices across the major platforms including both android and ios. we can also test your app across mac or windows pc as well as your web/cloud-based apps across the most commonly used web browsers including ie/edge, chrome, and safari.

"W" capital. ie - i.e. **Fixed and IE Doubt**

We can test your web/cloud-based apps across the most commonly used web browsers including ie/edge, chrome, and safari. we can also test your website for the mobile web including safari for ios, and chrome or firefox for android.

"W" capital. ie - i.e. **Fixed and IE Doubt**

Delivery Process

Our team works hand-in-hand with your product team to deliver the test cases and test results. we constantly update you on our testing status and retest the code when a bug is fixed to make sure it has been fixed indeed. we also give a final sign-off on your code before the code release happens.

"W" capital **Not Fixed**

Our team will deliver a comprehensive bug report after every test cycle. they will also deliver an interim bug report after every reported bug has been fixed.

"T" capital **Not Fixed**

Yes, our team provides a complete QA clear. they will test the entire application and make sure it's bug-free before providing a QA clear/go-no-go certificate.

"T" capital **Not Fixed**

Communication

What app do you use are there daily touch points?

what app do you "Use" - spelling error.

Put it like:

"What app do you use? Are there daily touch points?"

Not Fixed

Yes, our delivery manager will be in touch with your product/engineering manager on a daily basis to update on the status of the day's work and co-ordinate the activities for the next day. this usually happens through a recurring meeting or a scrum call, if the team is following agile.

grammar - update "you" on.... **Not Fixed**

Spelling - coordinate

For our internal use, we use asana for project management. we are happy to refer that to you if you are not using any or we can work with whatever project management tools you are using for your project.

"A" capital. **Asana not fixed**

Security & IP

Our app contains sensitive information. how about the security of the office?

Capitalize "H" in how. **Not Fixed**

All our test centers are secured. we follow the international best practices for this and ensure that your application is in safe hands. please refer to our security page for more info.

Capital W & P **Not Fixed**

Yes, our team does regression testing on all your existing code to ensure that nothing is broken in existing functionality when you are trying to release new features for your software. this is essential for feature continuity.

"T" capital. **Not Fixed**
